Prove

$$\delta \leq \frac{2\varepsilon}{\nu} \leq \Delta$$

$$\nu \left\{ \begin{array}{l} \delta \leq d(v_1) + \Delta \\ \delta \leq d(v_2) + \Delta \\ \vdots \\ \delta \leq d(v_\nu) + \Delta \end{array} \right\} \leq \frac{\nu \Delta}{\nu} = \Delta$$

$\frac{\nu \delta}{\nu} \leq \frac{2\varepsilon}{\nu} \leq \frac{\nu \Delta}{\nu}$
